Full-stack Software Engineer specializing in frontend development with experience building scalable web applications, reusable architectures, and enterprise platforms. Experienced in React, TypeScript, Nx Monorepo, and modern backend technologies, with a track record of delivering production features across fintech, AI, and digital asset exchange systems.

EXPERIENCES

PT Astra Honda Motor - North Jakarta, Sunter

September 2024 - October 2024

Intern as Fullstack Developer

- Developed a Vehicle Management System web application leveraging Java, Spring, jQuery, Bootstrap, Oracle, and the company's internal framework.
- Adhered to corporate development standards, including variable naming conventions, application architecture guidelines, file organization, and database schema standards (table and column naming).
- Gained hands-on experience in building management systems using [ASP.NET](#).

PT Meteor Inovasi Digital - Tangerang, Banten

November 2024 - Present

Full-time as Fullstack Developer

- Developed and maintained full-stack web applications across fintech, AI, digital asset exchange, and CMS-based client projects using React, TypeScript, Laravel, Java, and Spring Boot.
- Designed and implemented a modular frontend architecture within an Nx monorepo, improving code reuse and maintainability across multiple internal and partner portals.
- Integrated authentication and authorization using Clerk, implementing organization management, role-based access control (RBAC), and multi-factor authentication (MFA).
- Built Apache Airflow workflows to orchestrate Bloomberg data processing pipelines and implemented a Java gRPC service bridging Amazon MSK (Kafka) with Python applications.
- Developed AI-powered solutions, including a wealth advisor chatbot frontend and a proof-of-concept white-label RAG platform supporting configurable knowledge bases and document retrieval.
- Developed corporate and municipal web platforms, including a municipality website in the Netherlands, using Laravel, Blade, Filament CMS, and Statamic CMS, implementing reusable content blocks, custom CMS functionality, and responsive user interfaces.
- Integrated business-critical features such as eKYC account upgrades, QR-based transactions, and third-party APIs within financial services applications.
- Delivered production enhancements through bug fixes, dependency upgrades, code reviews, and cross-functional collaboration with backend engineers, QA, and product stakeholders.

EDUCATIONS

PT Dumbways Indonesia Teknologi - South Tangerang

April 2024 - July 2024

Graduated as Fullstack Developer

- Acquired experience in team-based projects, serving as a team leader and coordinating tasks effectively.
- Learned various technologies and tools, including HTML, CSS, JavaScript, Git & GitHub, TypeScript, React, Node.js, Express, NestJS, Chakra UI, Shadcn UI, Bootstrap, Prisma, PostgreSQL, and Tailwind CSS.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Java, Rust, Python
- **Frontend:** React, Next.js, Tailwind CSS, Bootstrap, Chakra UI, Shadcn UI
- **Backend:** Node.js, Express.js, NestJS, Spring Boot, Spring Framework, AdonisJS, ElysiaJS
- **Databases:** PostgreSQL, MySQL, Redis
- **Tools & Technologies:** Nx Monorepo, Prisma ORM, Apache Airflow, Apache Kafka (Amazon MSK), gRPC, Socket.IO, Git, Bun
- **Soft Skills:** Problem Solving, Critical Thinking, Communication, Teamwork, Adaptability, Time Management
